

OmniRide – Smart Ride Sharing & Seat Booking App

OmniRide is a smart ride-sharing application that allows users to book individual seats (1 or 2 seats) in a car instead of booking the whole vehicle. It is designed to make daily commuting affordable, efficient, and eco-friendly.

Features

- Book individual seats in a car
- Driver & Rider separate dashboards
- Live location tracking
- Secure online payments
- Authentication using Firebase
- Ride history & booking management
- Ratings & Reviews system

Tech Stack

- Frontend: React / Next.js
- Backend: Node.js / Express
- Database: Firebase Firestore
- Authentication: Firebase Auth
- Hosting: Firebase Hosting
- Version Control: Git & GitHub

Installation & Setup

- Clone the repository from GitHub.
- Run: npm install
- Run: npm start

Future Enhancements

- AI-based ride matching
- In-app chat system
- Subscription plans
- Admin analytics dashboard
